

Priorities for Advancing Living Evidence in Australia <i>Reviewed 1 March 2019</i>		Short-term	Med-term
1. Harnessing innovations in technology			
1.1	IT development to support end-to-end integration of the technical tools that underpin Living Evidence.	X	
1.2	Integrate Living Evidence tools into the clinical workflow (eg. via EMRs).		X
2. Improving methods and reducing inefficiencies in evidence synthesis and guideline development			
2.1	Provide international leadership to develop agreed definitions and approaches to Living Evidence.	X	
2.2	Develop agreed methods to enable data sharing between groups and advocate for greater evidence sharing to improve efficiency.	X	
2.3	Develop methods for integrating other data formats into Living Evidence synthesis (eg. clinical quality registry data, large observational cohort data).		X
3. Building consumer-focused evidence			
3.1	Develop a model for involving consumers in Living Evidence processes.	X	
3.2	Develop user-friendly tools to support consumers accessing up-to-date guideline recommendations.	X	
4. Prioritisation and harmonisation			
4.1	Develop a model for prioritisation and co-production of Living Evidence (involving clinicians, researchers, policymakers, consumers and evidence synthesis experts/guideline developers).		X
4.2	Develop an agreed approach to addressing co-morbidities through harmonised guideline recommendations.		X
5. New models for partnership and international collaboration			
5.1	Develop a test case for international collaboration on a living guideline recommendation.	X	
5.2	Explore opportunities to work with other sectors/leaders (HTA, digital health/data linkage, registries, knowledge translation specialists)	X	
6. Understanding the value of Living Evidence and how it can deliver the greatest benefit to patients & the health system			
6.1	Review current evidence and develop a value proposition paper highlighting the current state and long-term future of living guideline recommendations in Australia.	X	
6.2	Develop a business case for funding to support core Living Evidence platform development.	X	
6.3	Establish a series of demonstration projects for living guideline recommendations and collect prospective data to inform future investment and program development.	X
